☐ the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

3. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority in written form.  
☐ furnished subsequently to this Authority in computer readable form.  
☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.  
☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. The amendments have resulted in the cancellation of:

- ☐ the description, pages:  
☐ the claims, Nos.:  
☐ the drawings, sheets:

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)).

**Re Item I**

**Basis of the report**

The documents mentioned in this International Preliminary Examination Report are numbered in accordance with the order they appear in the International Search Report.

**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

The present invention relates to a synergistic fungicidal composition containing a first compound of formula III or IIIa as set out in claim 1 and a second compound from a list given in claim 1.

The first compounds are known from D1 and D2. Many of the second compounds are known from D3 to show synergistic fungicidal activities with certain other fungicides which are different from the first compounds. None of the cited documents teach synergistic fungicidal compositions containing the first compounds, let alone specifically with the second compounds listed in claim 1. Due to the specificity and to the unpredictable aspect of synergy, the present invention is believed to be new and to involve an inventive step.

The fungicidal activity is shown throughout the whole description as directed to crop protection. Therefore, the present invention is industrially applicable. For sake of completeness, the phytopathogenic target should have been mentioned somehow in the claims, as in certain regional/national phases the wording of claim 8 can be considered to encompass methods of therapy (fungicidal treatment on an animal/human being). Claim 8 could then be deprived from industrial applicability and/or be excluded for non-patentability.
